ABSTRACT

GST is a taxation procedure for goods and services transported from one destination to other it was discussed for years by the government of India to get implemented. Taxation and its associated governing laws, in the current scenario, is playing a significant role in the life of business. Individual also for the government for the betterment of policies for social goods. This paper is designed to provide an overview of the impact of GST when implemented. The paper is made using exploratory research methodology using secondary data. The study leads information that, GST is beneficial for most of the industrial sector. This is due to the fact that, as of now Indian government is not charging any tax on agricultural goods for domestic consumption wherein, when GST is implemented, tax will be imposed on agricultural products also. This may lead to rising in the price of the agricultural products, which is considered to be basic entity for the survival. There on implementing GST paves a path for India's industrial and implementation tax policies on certain commodities will create a beneficial impact on industry, individual and economy of India. This study is focusing an impact of GST on selected sectors of Indian Economy.

Keywords: Zero rated supply, Industrial sector, Tax Regime etc

INTRODUCTION

Goods and service tax (GST) is a proposed system of indirect taxation in India merging most of the existing taxes into single system of taxation. It was introduced as the constitution (one hundred and first amendment) Act 2016. The GST is administered governed by GST council and its chairman is union finance minister of India Arun Jaitley. GST would be a comprehensive indirect tax on manufacture, sale and consumption of goods and services throughout India, to replace taxes levied by the central and state governments.

This method allows GST-registered businesses to claim tax credit to the value of GST they paid on purchase of goods or services as part of their normal commercial activity. Taxable goods and services are not distinguished from one another and are taxed at a single rate in the supply chain.

Abstract:

Karnataka Power Corporation Limited (KPCL) is an undertaking of Govt of Karnataka which is entrusted with the task of Generation of electricity in the state. Sighting the need of increasing the demand of electricity, KPCL along with its Hydel Project came up with Thermal Power Project at Raichur with 8 units of 250mw capacity with a total of 1720 production per day. Today, Raichur Thermal Power Station (RTPS) has become the pride of Govt of Karnataka and one of the mega success power projects in India, with its dedicated and professional workforce RTPS is marching ahead with great hopes.

Karnataka Power Corporation Limited (KPCL) is a production based mega organization, which embarks on skilled and efficient workforce. Endeavored to meet the engrowing needs of power and to fill the gap of demand, it is constantly striving hard. In this organization welfare measures are considered to be an important tool to improve and motivate the workforce for better efficiency, there by improvement in the productivity. Therefore, contentment of the workforce is an essential parameter which leads the organization for success.

Introduction: The power-generating sector is playing a vital role part in the industrial revolution. Since it is a basic input for the industries, uninterrupted power supply is inevitable. Hence, contended workforce is an indispensable ingredient of the organization to dispose their efficient and hard work. Therefore, it is on the part of management of the corporation to provide adequate welfare and security measures to the entire
